[Business Mathematics By Vk Kapoor](#)

Numbers arranged in rows and columns of the rectangular array (square brackets [] or parenthesis () or pair of double vertical lines | |) matrix. Matrix is thus, defined as a rectangular array of ordered rows and columns. The numbers are also known as elements of matrix. A matrix with m rows and n columns is written in the form as:

PDF

The first subscript 'm' refers to the 'number of rows' and the second subscript 'n' refers to the 'number of columns' in the particular matrix. Thus a_{ij} is the element of i^{th} row and j^{th} column in the matrix. Similarly, a_{ji} is the element of j^{th} row and i^{th} column, and a_{ij} refers to the element of i^{th} row and j^{th} column in the matrix. Generally, the dimension or order of a matrix is determined by the number of rows and columns it has. A matrix is denoted by capital letters like A, B, C etc. Some examples are:

$$A = \begin{bmatrix} 1 & -1 \\ 3 & 2 \end{bmatrix} ; \text{ 2x2 matrix}$$
$$B = \begin{bmatrix} 1 & 2 & 1 \\ 2 & 3 & 1 \end{bmatrix} ; \text{ 2x3 matrix}$$
$$C = \begin{bmatrix} 11 & 2 & 10 & 1 \\ 2 & 4 & 10 & 1 \\ 10 & 3 & 5 & 6 \end{bmatrix} ; \text{ 3x4 matrix}$$

2 x 2 matrix has 2 rows and 2 columns

2 x 3 matrix has 2 rows and 3 columns

3 x 4 matrix has 3 rows and 4 columns
